While the rapid development of modern technologies reshapes the future, it has also brought immense transformations to education and induced endless possibilities. To better understand students’ ideas and expectations about education and artificial intelligence (AI) for a better future, Smart City Consortium, the organiser of Learning & Teaching Expo 2025 (LTE 2025), has heard from over 2,000 primary and secondary students aged 6 to 18 in Hong Kong, with the findings as follows:

1. Over 90% of the students agree that AI technology facilitate learning by helping them with tasks such as searching for information, verifying facts, providing answers to their questions round the clock, and tailor-making solutions according to their learning progress and specific needs.

2. 100% of the students agree that human teachers are irreplaceable by AI. When students suffer from emotional distress, many of them would find comfort and support from their teachers. Students also cherish teachers responding to their questions with personal input and offering motivation by sharing relevant personal experiences. In general, students emphasise that genuine emotional support from teachers is crucial to them.
3. Over 90% of students believe that AI can assist human teachers in various ways, including helping teachers to mark assignments and exams, providing supplementary information for their teaching, and utilising technology to design games to enhance students' learning, enabling them to have more time to interact with students outside the classroom, such as talking, playing, and participating in activities that both teachers and students find interesting.

With an aim to bring educators and stakeholders together to explore the latest advancements and technology integration in teaching and learning, and insights on enhancing the holistic wellbeing of students, parents, teachers and principals, Smart City Consortium proudly presents the annual mega event LTE 2025 from 2 to 4 July at Hong Kong Convention and Exhibition Centre, presenting revitalised ideas and experiences to the education community. Principals, teachers, parents, students and education professionals are cordially invited to pre-register for entry.

Organised by Smart City Consortium, presented by Hong Kong Education City (EdCity), and supported by the Education Bureau of the HKSAR Government, LTE 2025 features the theme “Education: A Shared Future for All”, presenting around 600 booths and 270 programmes covering various topics of Learning, Teaching and Technology, etc. LTE 2025 serves as a premier platform that brings together educators, professionals, government representatives and innovators worldwide to promote collaborations and knowledge exchange on diverse topics and emerging trends, including AI in Education, Sustainability Education, Social Emotional Learning, Sustainability of Education and Home-School Cooperation. With an aim to generate actionable goals and directions in education development, LTE 2025 presents practical solutions through various keynote presentations, seminars, workshops and product showcases that drive the future of education and enhance the learning and teaching experiences for principals, teachers, parents and students. Event highlights include:

Principals' Conference

During this 1.5-day conference, local and overseas scholars, educators and principals share their professional experience and innovative educational ideas on various topics, including Future Jobs in the AI Era, Technology vs Humanity, Wellbeing, Social-emotional Learning, and Education beyond the Classroom.

Kids' AI Summit

In collaboration with the Boys' & Girls' Clubs Association of Hong Kong (BGCA), 100 primary and secondary school students from local and international schools are invited to express their insights on AI's impact in different aspects including education, wellbeing, safety & security, diversity, and future career.

Language Learning Hub

The hub displays advanced AI-powered tools, innovative pedagogies and curricula on language learning and teaching presented by CUHK, HKUST, HKMU and GAPS, in which visitors can discover inspiring ways to utilise the “Pilot Scheme on Other Languages for Junior Secondary Students” offered by Education Bureau.

STEAM Zone

A dedicated zone showcases the latest STEAM learning and teaching materials, programmes and students' works, including the SteamUp Exhibition by the Construction Industry Council (CIC), an area spanning over 10,000 square feet to demonstrate achievements from innovative education and project-based learning.

Startups Circle

The zone offers a platform for EdTech startups to demonstrate their new

products and solutions to educators.

Student Competitions

A range of competitions themed around AI, robotics, space technology, pitching, smart sports and STEAM offer precious opportunities for students to exchange ideas and learn from each other.

Thematic Seminars

Through seminars on the main stage, Pedagogy & Curriculum Theatre, AI in Education Theatre, Wellbeing Theatre and DEI (Diversity, Equity and Inclusion) Theatre, etc., educators share innovative and effective teaching strategies and pedagogies, as well as quality resources, covering K12 Education, Special Education, Early Childhood Education and Tertiary Education.

Open Lessons

At the Innovation Classroom and EdTech Classroom, teachers conduct open lessons and interact with the audience to demonstrate how to integrate EdTech with innovative pedagogies in different subjects to equip students with competencies that fit the needs of the modern digital era, and enhance students' engagement and motivation.

International Pavilions

Featuring overseas educators and solution suppliers from countries and districts including Korea and Singapore, the pavilions foster insightful knowledge exchange and international collaborations in education.
